

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE

This, the eighth number of the Document catalogue (Comprehensive index), includes all documents and reports submitted to Congress March 4, 1905, to March 4, 1907, without regard to the time when they were printed, and, in addition thereto, all publications of the Executive Departments, bureaus, and offices of the Government issued during the two fiscal years July 1, 1905, to June 30, 1907.

At the end of this volume, as in previous numbers, will be found arranged in a single alphabet a list of Government authors consisting of those Departments, bureaus, and offices of the United States Government which are represented by entries in this number of the Document catalogue. In addition to this, the same material is arranged in another list by Executive Departments, independent offices, etc., with alphabetical lists of subordinate bureaus and offices under each. In these arrangements will be found also alphabetical lists of the Senate and House committees that submitted reports during this Congress.

For the benefit of readers who may not have at hand the previous volumes of the catalogue, the following statements are made relative to the style of expressing titles of documents or reports. When a document has a title-page or a distinctive heading the wording of the catalogue entry follows exactly the order of words contained therein. Words are omitted without indicating the omission in any way; but if insertions are made or the order of words altered such changes are indicated by brackets. Committee reports have no titles, and for these reports the catalogue entry follows a conventional wording incorporating the distinctive title of the bill or joint resolution on which the report is made. Simple and concurrent resolutions have no title, therefore catalogue entries for reports on them are made up so as to give the subject-matter of the report. When a title is amended in committee the amended title is chosen. A conventional wording is used for titles of pension reports and a few others.

The date used in entries for Congressional documents, if year, month, and day are specified, refers to the date when the document was ordered printed; but if the year only is specified it refers to the time of publication. Unless otherwise indicated, annual reports are designated by fiscal years, which always end with June 30 of each calendar year. The date of the fiscal year covered by an annual report is followed by the date of publication. In citing an annual report the fiscal year covered by the report is used and not the year of publication.

AUGUST DONATH,
Superintendent of Documents.

Bills.

NOTE.—Bills and resolutions, simple, concurrent, and joint, are not catalogued directly, except in the rare cases where a special edition is printed for general distribution. The catalogue entries for the committee reports on them embody the exact title of the bill, and serve as complete substitutes for cataloguing the bills themselves. The following directions refer to these report entries as equivalent to bill entries. Considering bills and resolutions in 4 classes, class 1 are the large number which are presented to Congress, but on which no committee report is made, and which do not become law. Class 2 are the very few on which no committee reports, but which become law notwithstanding. Class 3 are those on which a committee reports but which fail to pass. Class 4 are those on which a committee reports and which become law thereafter. For class 1 consult the index of the Congressional record. Classes 2, 3, and 4 can be found under the subject of the bill, and classes 3 and 4, by reference, under the committee and the Senator or Representative making the report. Classes 2 and 4 have appended to the entries the pages in the Statutes at large, where the text of the bill passed into law can be found.
